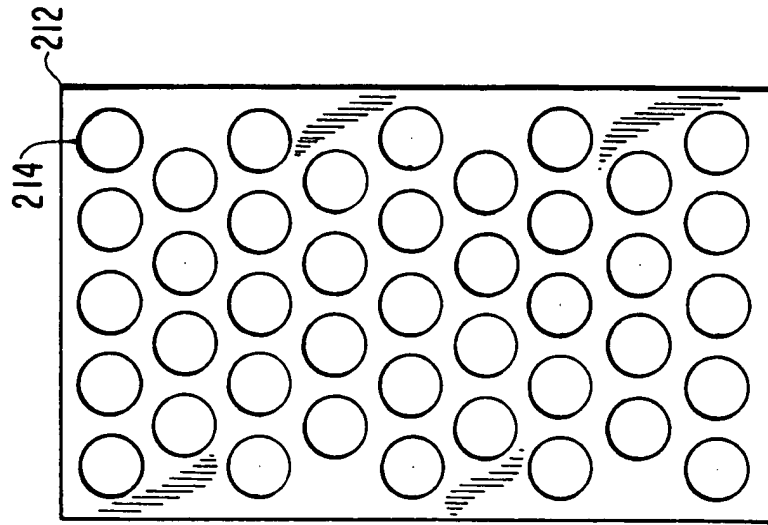

FIG. 9

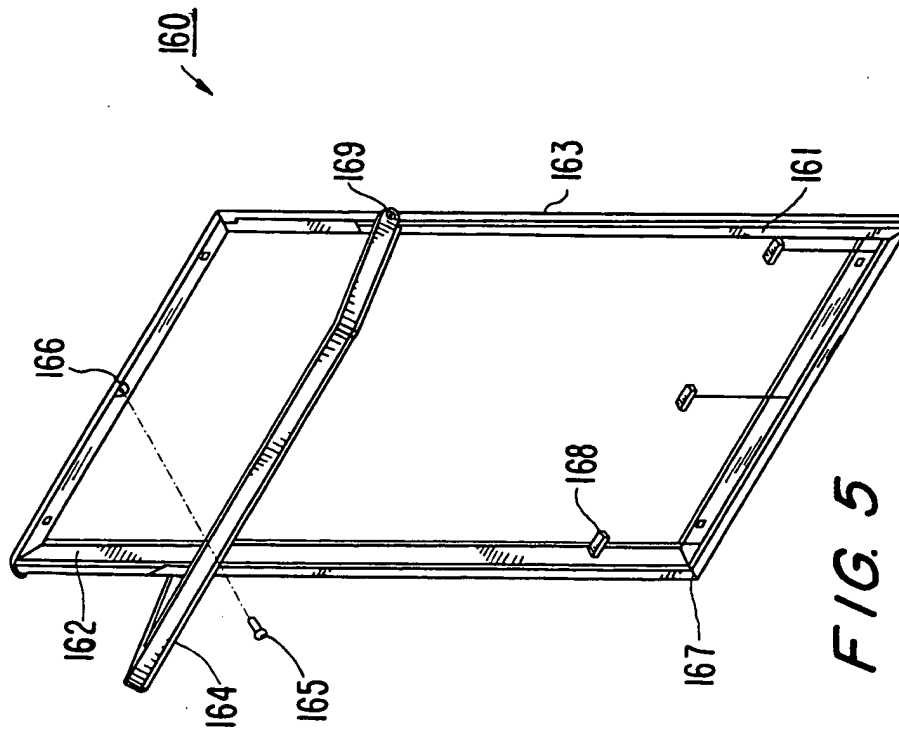

FIG. 5

This diagram shows a cross-sectional view of a second embodiment of the device. It features a second substrate 170, which is a thin, elongated rectangular block. A second layer 172 is positioned directly beneath the second substrate 170. The second layer 172 is depicted with a series of vertical lines of varying heights, suggesting a textured or patterned surface. The second substrate 170 is shown with a slight upward curve at its ends, and a small gap is visible between it and the second layer 172 in the center.
